Permit fee: Current

Bond Amount: \$0

Purpose of Inspection: This was a routine inspection.

Inspection Summary:

The mining claims are located in a wilderness study area. No recent mining activity or disturbance was observed.

Evaluated comments:

- 1) In order to have a valid mining permit, regulation R647-3-111.1.11 requires the operator furnish and maintain a reclamation surety. The bond amount determined by the Division for the Silver Dream mine is \$20,600 dollars. The amount is based from the number of acres requested in the mining Notice of Intention to Commence Small Mining Operations (Plan) submitted by the operator. If the bond amount seems egregious, then the operator should amend the NOI to reflect the acres of disturbance desired.
- 12) A GPS map has been made showing access to the site.

(Photographs attached)

Conclusions and Recommendations:

The operator needs to post and maintain adequate reclamation surety with the Division of Oil, Gas and Mining (DOGM) in the amount of \$20,600 dollars. Failure to provide adequate reclamation surety will result in the withdrawal of the mining permit.
